

Health and Social Care and Ageing and Gerontology

Spring/Summer 2024

Welcome

An ageing population poses urgent challenges to society that we need to raise awareness of and find solutions to. The titles on our Ageing and Gerontology list are at the forefront of these important discussions and we want to ensure that invaluable research is made accessible.

We are seeking to publish broad research that fills a clear gap in the current literature, pushing forward knowledge and re-framing perspectives. If you have an idea that fits with our approach, please contact:

The proportion of employees with caring responsibilities is growing and, as a result, policies that support working carers are becoming increasingly important.

Written and informed by national experts, this is the first publication to provide a detailed examination of the development and implementation of carer leave policies and policies in 9 countries across Asia, Oceania, Europe and North America.

It compares the origins, content and implications of national policies and practices intended to enable workers to provide care to family members and friends while remaining in paid employment —known as ‘carer leave’.

Social Care in the UK's Four Nations

Between Two Paradigms

Catherine Needham and **Patrick Hall**

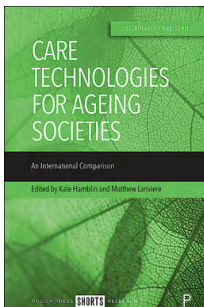

Drawing on interviews with national and local policy makers across the UK, the book raises vital questions about the role of 'standardisation' and 'differentiation' in social care, concluding that when given equal capacity to reform their respective systems, the regimes in each nation may take radically different shapes.

Chapters 4, 'The mechanisms of social care reform', and 7, 'The limits of social care reform', are available to read Open Access on Bristol University Press Digital.

Reablement in Long-Term Care for Older People

International Perspectives and Future Directions

Edited by **Tine Rostgaard, John Parsons** and **Hanne Tuntland**

Our societies are ageing, and we need to identify sustainable and person-centred solutions for supporting frail older people in their homes.

Reablement offers a radical new integrated care approach which supports older people to regain and maintain functioning and independence. This interdisciplinary book provides an introduction to the remarkable, if haphazard, international growth in reablement policies and practices in aged care over the past 20 years.

Incorporating theoretical and empirical research, it considers benefits for clients and care workers, cost-saving potentials and reablement provision for people with dementia. Finally, the book reflects on key findings, challenges and the way forward for long-term care for older people.

The introduction, 'The concept, rationale, and implications of reablement', is available Open Access via Bristol University Press Digital.

Health Policy in the United States

Access, Cost and Quality

B. Guy Peters, University of Pittsburgh,

"A remarkable introduction to America's medical arrangements."

TED MARMOR, YALE UNIVERSITY

"B. Guy Peters conveys the complexities of health care policy, and the extra layers of complexity involved in the development of the American system, in a manner that is accessible and highly informative."

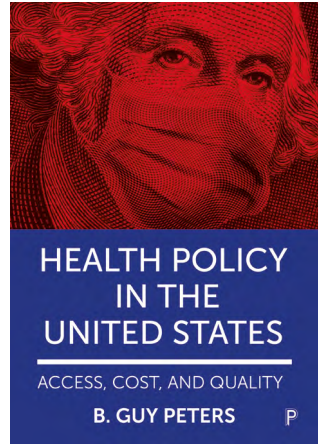

ALEX WADDAN, UNIVERSITY OF LEICESTER

Written by a health and public policy expert, this book provides a comprehensive exploration of the under-appreciated role of public health policy in the United States' medical care industry.

It offers students:

- an introduction to the fundamentals of health policy, with comparative perspectives from other countries;
- analysis of major health care programmes, including Medicare, Medicaid, the Affordable Care Act and regulatory programs;
- reflections on issues around access, quality, cost, and the ethics of provision.

By drawing comparisons between the US and other countries, it deepens our understanding of health policy in the US, where it is headed next, and what it might learn from other systems.
